Description

Description

A single-day workshop offering experience in specific applications of AI and data science. This session provides practical skills and immediately applicable knowledge in specialized areas. Each participant is advised to bring their own laptop to be able to follow along and participate with the topics presented.

Instructor:

Dr. Ahmed Elshall (Ph.D.)

Goal:

This hands-on workshop equips faculty with strategies to integrate generative AI into course design and assessment while preserving academic rigor and learner agency.

Learning Outcomes:

- Why reactive AI policies fail: evidence from higher education
- The FACT-A3 framework for AI-integrated course and assessment design
- Pedagogical strategies for aligning AI use with learning goals
- Assignment design: no-AI, AI-resistant, structured AI, and open AI use
- Designing hybrid assessments that balance AI support and rigor
- Instructor roles in AI-enabled learning: mentoring and metacognitive modeling
- Hands-on redesign of participant assignments using the framework

Dates/times:

- May 05, 2026 (9:00am-12:00pm EDT)
